LETTERPRESS HIP FLASK

This flask has been made using hand-carved blocks or photopolymer plates that have been printed on leather reclaimed from old clothing. It was printed on a Nolan #2 Proof Press using ink that will not run when exposed to liquid. In case of spillage, wet the area with a paper towel and allow the liquor to evaporate naturally. To clean the inside of your flask, use a funnel to fill with soapy water, shake, and repeat with clean water. Each flask holds 6 oz, or 4 shots. Please measure before filling your flask and use a funnel for best results (one can easily be shaped out of foil). Please only keep liquor or water in your flask, as acidic liquids such as juice can damage it. Lastly, do not try to dry your flask on the stove or in the microwave, and attempting to fill it when you are already drunk usually doesn't end well either.
